Admin Office

## Description

Assembly / Lunchroom

Science Labs

Classroom Space

Reception Area

Conference Room

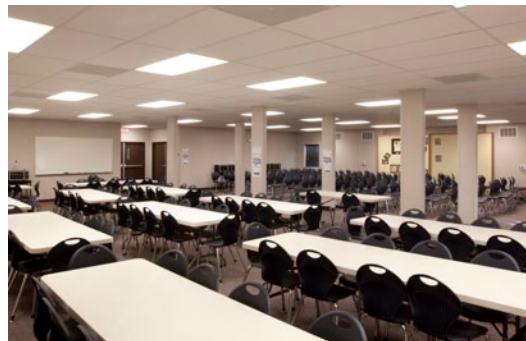

Library

Locker Space

## Completion

6 months

Traditional  
Modular  
Construction

The Covenant Classical School of Fort Worth, TX was set to expand to a new location, and needed an interim solution prior to starting the planning and ultimate construction of a new K-12 permanent school. The project consisted of three 7,236 square foot buildings for their lower, middle, and upper schools. The lower school building provides for nine classrooms and a teacher's lounge, while the middle school facility includes seven classrooms, a music room, and locker space. The upper school building features a large assembly/lunchroom, with a science lab and four classrooms. There is also a 1,890 square foot administration building with seven offices, a reception area, conference room, and library.
