BuyBoard

Facility Use

Courtroom and

Admin Space

Description

R-Panel exterior siding, VCG walls, VCT tile flooring

Completion

120 days

Relocatable
Modular
Buildings

Located in the center of downtown Edinburg, Texas, Hidalgo County's decision to renovate their existing courthouse building created a series of challenges in how to secure adequate interim space for day to day operations during construction. To minimize the expense and the potential for costly delays, Hidalgo County chose to install three modular buildings totaling 14,000 square feet on a parking area adjacent to the existing courthouse. Ramtech provided assistance in the preplanning phase, and with the design and engineering for two buildings with five courtrooms, jury rooms, conference areas for the attorneys and their clients, judges chambers, offices for court staff and reporters, foyers with security at the public entrances, and an additional building for the county clerk's office.
