

Immanuel Lutheran Church

Broken Arrow, OK

Project Size

13,120 sq ft

Construction

Type V-b

Contract Type

Design-build

Facility Use

Pre-K & Kindergarten

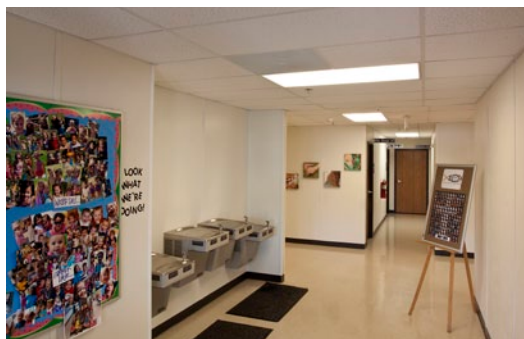

Description

14 classroom building with brick and simulated stucco, and steel siding

Completion

90 days

Permanent
Modular
Construction

Immanuel Lutheran Church needed a new classrooms to support the number of enrollment applications for their pre-kindergarten and kindergarten program. Having a tight budget but a desire for a truly permanent facility, Immanuel chose to work with Ramtech on a 14 classroom 13,120 sq' modular building that was completed in under 90 days. Using a value engineering approach, the Church chose to take on the responsibility for some of the utility and site development while Ramtech designed, manufactured, and supervised the building installation and finish-out. The exterior incorporates a brick wainscot with a simulated stucco siding on the two visible sides of the building and a lower cost steel siding for the back two sides.
