110 days

Accelerated  
Building System

To facilitate growth Ramtech designed and constructed this 6'480 square foot rural health clinic utilizing its Accelerated Building System and provided full construction services including the development of the site and installation and finish-out of the floorless modules in the northeast Oklahoma community of Stillwell. The building attached directly to the hospital via a covered corridor and features a masonry exterior and architectural standing seam metal roof. The facility is home to five physicians and includes a total of 15 exam rooms, 4 procedure rooms, medical records and billing offices.
